082110134005 | rafifrw@gmail.com | <https://www.linkedin.com/in/rafifrw-291358252/> | <https://github.com/rafifrw1>

Motivated Full Stack Developer with a passion for building scalable, reliable, and well-structured web applications from front to back. Committed to writing clean, maintainable code across the entire stack while ensuring seamless deployment through modern DevOps practices. A fast learner with a collaborative mindset, eager to grow alongside high-performing teams and contribute to delivering real-world software solutions.

Work Experiences

PT. Amerta Indah Otsuka - Pasuruan, Infonesia Jul 2025 - Jul 2026

Full Stack Developer Intern

- Integrated Corporate Communication Superapps using Docker and Kubernetes (Kubesphere) to streamline deployment processes for multi-departmental applications, ensuring high availability and scalability for internal tools.
- Architected and developed a comprehensive Laundry Management System from the ground up, featuring a 3-step approval workflow, SAP data integration for vendor/cost center management, and automated invoice reporting.
- Achieved the Platinum Award at TKMPN 2025 for demonstrating excellence in technical innovation and problem-solving through corporate application development.

Education Level

State Polytechnic of Malang - Malang, Indonesia Jul 2022 - Aug 2026 (Expected)

Bachelor of Business Information Systems, 3.75/4.00

Projects

Corporate Communication Supperapps - AdonisJS, Angular

An integrated hub using Microservice and Micro Frontend architectures to centralize all Corporate Communication tools (Ecovillage, Factory Visit, Digital Asset Management System, Otsume), enhancing cross-functional data access and operational efficiency.

Ecovillage - AdonisJS, Angular

A CSR-focused waste management platform featuring full CRUD modules for waste bank transactions, financial reporting, and real-time data dashboards for community waste and maggot cultivation tracking.

Otsume - AdonisJS, Angular

A modern POS and inventory remake for corporate merchandise, featuring mobile receipt printing, automated stock transfers with recipient validation, and integrated barcode scanning for streamlined sales.

Digital Asset Management System - AdonisJS, Angular

A cloud-based digital asset management system featuring granular internal folder sharing, automated access request workflows, and drag-and-drop functionality for optimized document organization.

Factory Visit - AdonisJS, Angular

An automated guest management module that digitizes registration, visit planning, and survey feedback, including automated certificate generation and visitor data reporting.

Laundry Apps - AdonisJS, Angular

A custom internal service application featuring a 3-step approval workflow for item tracking and SAP integration for vendor/cost center data management and automated invoicing.

FASTVENA - Express, Angular

A digital vendor audit system that automates the evaluation cycle, featuring real-time ranking dashboards, automated weekly reminders, and dynamic reporting to ensure supply chain transparency.

Skills, Achievements & Other Experience

- **Programming & Databaase:** JavaScript, TypeScript, PHP, Java, Dart, MySQL
- **Frameworks & Environments:** Express, AdonisJS, Angular, Laravel
- **Tools & DevOps:** Git, GitHub, GitLab, Docker, Kubernetes
